

# 2022 Highlights

## NAEP is an integral part of education in the United States.

- Elected officials, policymakers, and educators all use NAEP results to develop ways to **improve** education.
- NAEP provides a **common measure** of student achievement across the country.
- NAEP data can be used to compare and understand the performance of **demographic** groups within your state, the nation, other states, and select urban districts.
- NAEP is assessed with a **random** sample of students from selected schools.
- Teachers can use **sample** NAEP **questions** and scoring guides as a resource for understanding student performance.
- Participating in NAEP allows students with disabilities and English language learners to experience a large-scale assessment administration **without** high-stakes consequences. Since NAEP **does not** produce scores for individual students or results for schools, participation in NAEP is not tied to grades or evaluations of students, teachers, or schools.

In spring 2022, NAEP was given in Arkansas for the areas of mathematics and reading for 4th and 8th grade students. NAEP tests receive a score between 0-500 points.

### Mathematics 2019 Grade 4

The percentage of students in AR who performed at or above the *NAEP Basic* level was 69% in 2022. This percentage **was** significantly different from that in 2019 (75%) and was **greater** than that in 2000 (55%).

In 2022, Black students had an average score that was 29 points **lower** than that White students. This performance gap was **not significantly different** from that in 2000 (31 points). Hispanic students had an average score that was 17 points **lower** than that White students.

In 2022, students who were eligible for free/reduced-price school lunch, an indicator of low family income, had an average score that was 22 points **lower** than that for students who were not eligible. This performance gap was **not** significantly different from that in 2000 (23 points).

The *NAEP Basic* score in AR was **higher** than 2 states/jurisdictions (DC, NM) and **not** significantly different from 22 states/jurisdictions.
